ABOUT ME

Computer Engineering student with hands-on experience building cloud infrastructure, serverless applications, and CI/CD pipelines. Built and deployed AWS-based systems using Terraform, SAM/CloudFormation, Docker, and GitHub Actions, with a focus on automation and reliable infrastructure.

PROJECTS

Serverless Video Synchronization Platform

[GitHub repository](#)

Personal Project

Aug. 2026

- Built a full-stack real-time platform for synchronizing YouTube playback and chat across shared rooms, using a TypeScript monorepo and a serverless AWS backend.
- Designed the backend with API Gateway WebSockets, Lambda, and DynamoDB, managing infrastructure through AWS SAM/CloudFormation.
- Deployed the Astro frontend to S3 and CloudFront, with automated cache invalidation through the deployment pipeline.

Personal Web Infrastructure & CI/CD Pipeline

[GitHub repository](#)

Personal Project

Jul. 2026

- Provisioned AWS infrastructure with Terraform and deployed an Astro application behind an Nginx reverse proxy with automated TLS certificate management.
- Built a GitHub Actions CI/CD pipeline that validates pull requests, builds multi-stage Docker images, publishes them to Amazon ECR, and deploys the application to a VPS over SSH.

Portfolio Optimization

[GitHub repository](#)

UAM Cuajimalpa · CDMX, Mexico

May. 2026

- Developed a web dashboard using Streamlit for real-time experimentation and visualization of financial portfolio configurations.
- Processed historical financial time series data and implemented the Particle Swarm Optimization (PSO) algorithm for risk-return allocation decision-making.

EDUCATION

Computer Engineering

UAM Cuajimalpa · CDMX, Mexico

Oct. 2022 – 2027

SKILLS

Cloud & DevOps: AWS, Terraform, AWS SAM, Docker, GitHub Actions, Nginx, Linux, Git

Languages: TypeScript, Python, Bash, SQL

Frameworks & Libraries: Node.js, Astro, Streamlit, NumPy, Pandas

Practices: Serverless Architecture, Infrastructure as Code (IaC), CI/CD
